IVECO

DAILY

Iveco Motorhome

Drive smarter.

The IVECO Motorhome family is always ahead of the pack, anticipating your needs to future-proof your holiday perspective.

Whatever you are looking for, from a compact home away from home to a luxurious mobile holiday destination, IVECO has the motorhome for you: with the **Daily HI-MATIC**, **Daily 4x4** and **Eurocargo**, the extensive range offers a solution to every requirement. IVECO motorhomes move with the times and, in a fast-changing world where automation plays an increasingly important role, make significant progress on the path towards autonomous driving and enhanced safety features. When you choose IVECO, you know you can look forward to enjoying your holiday in the best comfort and safety.

The **Daily HI-MATIC** is your dream holiday home: it builds on this vehicle family's 40-year history of continuously pushing the boundaries to provide a first-class environment, constantly raising the bar on safety and comfort. A light vehicle, the Daily HI-MATIC is easy to handle and provides absolute driving pleasure with IVECO's exclusive 8-speed automatic gearbox, AIR-PRO intelligent pneumatic suspension, high-comfort memory foam seats, unique vocal driver companion, and top of-the-class advanced driving assistant system. It embraces connectivity to unlock a world of highly personalised services specifically designed for your motorhome and your requirements. True to its heritage, the Daily HI-MATIC will raise your living and driving experience to new heights.

If your holidays take you off the beaten track, the **Daily 4x4** is the solution for you: it will take your mobile dream home wherever you want to go, easily overcoming every difficulty on all terrains.

The **Eurocargo** is the motorhome for you if you want to take luxury with you on your travels. On the road, you will enjoy the easy handling, superior driving comfort and outstanding performance – and you will be driving safely with the advanced electronically controlled systems.

Daily HI-MATIC

Your dream holiday home.

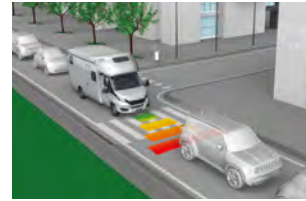

We assist in safe and **stress-free holidays.**

The Daily makes significant advances on the path towards autonomous driving and safety with the introduction of a complete set of Advanced Driver Assistance Systems that will enable you to enjoy your journey to the full. They will reduce the risk of accidents, help you in tricky situations and take the stress away from driving – to the benefit of your quality of life aboard your motorhome.

Avoid collisions with AEBS and CITY BRAKE PRO

The **Advanced Emergency Braking System** (AEBS) helps keep you safe by detecting a potential collision ahead and braking autonomously, preventing collisions at speeds below 50 km/h and drastically mitigating damage when travelling faster. In busy traffic, while driving through a city for sightseeing, the **City Brake PRO** prevents collisions at speeds as low as 5 km/h.

Stress-free journey in holiday traffic

Queue Assist takes the stress out of holiday traffic: at the touch of a button, set the safety distance you want to keep, and the Daily will stop when the car ahead stops. When the car moves off, a light touch on the accelerator will get your Daily motorhome going again.

Cruise safely on the motorway

It can be difficult to stay alert during long drives on motorways; **Adaptive Cruise Control** helps you stay safe. Once you set your cruising speed and minimum distance from the vehicle ahead, the system reacts and autonomously adapts your speed to maintain the safety distance.

Always stay in your lane

The **Proactive Lane Keeping Assist** acts on the Electric power steering and gently brings you back to the centre of the lane if you drift out. You can set the distance from the painted lane marking and the stroke intensity on the steering system.

Drive safely down steep slopes

Driving a loaded motorhome down a long, steep slope can be daunting, but with the Daily you won't think twice about it. It is the only motorhome in the market with **Hill Descent Control** (HDC) on Rear Wheel Drive, that maintains a steady speed by autonomously operating the brakes, helping you drive downhill slowly and safely.

Stabilise your motorhome in crosswinds

Strong winds when driving on a bridge or overtaking heavy trucks are no challenge with the Daily's **Crosswind Assist**, which stabilises the vehicle against a powerful gust of side wind. The sensors activate the brakes on the side of the vehicle hit by the wind, ensuring its stability and your safety.

Safe braking with TELMA® electromagnetic retarder

The optional **Telma® Retarder** adjusts automatically to the vehicle's speed and can take over 90% of braking. When driving downhill, it slows down the vehicle independently of the standard brakes leaving them de-stressed and effective in case of emergency braking, keeping you safe.

Get a grip

Activate **Traction Plus** to keep a firm grip in on slippery surfaces. It is available on the Rear Wheel Drive – a first in the industry for this type of vehicle. Enjoy your motorhome on all terrains!

Stay in control with Camper-ESP

Electronic Stability Program (ESP) automatically applies braking to each wheel individually and reduces engine power to help you steer until you regain full control. This adaptive system detects and adapts to the allocation of the loads in your motorhome ensuring it doesn't break away on difficult surfaces. Stability in all conditions.

On your way in all road conditions

The Daily HI-MATIC ensures perfect traction in every situation with the **differential lock** at the rear axle, which is activated with the ergonomic switch on the dashboard.

Environmentally friendly driving pleasure.

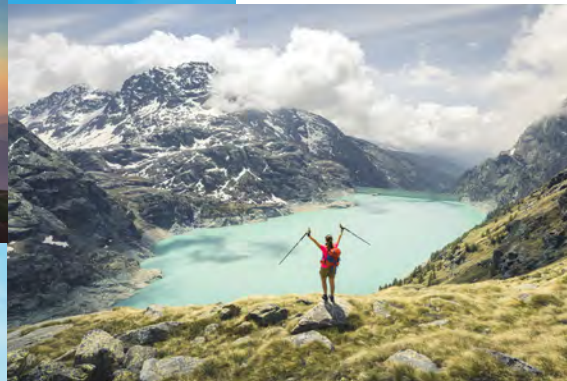

The Daily HI-MATIC is the only motorhome on the market that offers you the choice of two engines optimised for top performance in every type of journey you will take it on

The 2.3-litre engine generates power ranging from 136 hp (101 kW) to 156 hp (116 kW), while the 3.0-litre heavy-duty engine is available in two power ratings, delivering a powerful performance ranging from 176 hp (129 kW) to 207 hp (152 kW). The maximum torque of up to 470 Nm (3.0 litre), starting at 1,400 rpm and with an ample operating range, ensures you will enjoy the best drivability.

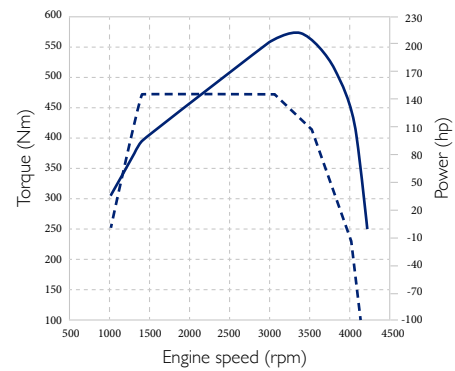

All the engines are compliant with the stringent Euro VI-E emissions regulations. If you want your holidays to be even more environmentally friendly, you can choose the clean-running and quiet Compressed Natural Gas version of the 3.0-litre engine.

Whichever engine you choose, you can count on the legendary durability of the Daily, which has been extended even further.

**Available for vehicles equipped with the Connectivity Box.

Welcome to IVECO's world of **connected services.**

Your Daily's connectivity opens up the world of IVECO ON integrated services and transport solutions designed to make your life easier and your holiday more pleasant.

Maximise your Daily's uptime

Your Daily is connected to IVECO's Control Room, which constantly monitors its performance and through remote telediagnostics can take preventive actions to keep your vehicle on the road.

Easy Daily App

The new IVECO ON Easy Daily app is designed to make your life as an IVECO Daily driver easier. You can use it to view your Driving Style Evaluation tool, activate the IVECO Assistance Non-Stop, and access remotely your motorhome's diagnostics information. Simple.

Technology at **your service.**

Intuitive interaction

- High-resolution colour display cluster
- Clear and user-friendly interface
- Intuitive navigation of key settings
- Easy access to information

Real-time tyre pressure monitoring

- Pressure data display on cluster
- Maintain optimal tyre pressure
- Drive safely and save fuel
- Available on single- and twin-wheel models

MYIVECO infotainment system

- Clear display with 7" Screen
- DAB radio
- Driving Style Evaluation
- Mobile device mirroring
- Rear camera display

MYIVECO infotainment with TomTom®

- Motorhome navigation
- Live Traffic
- Speed limit warnings
- Speed Cameras
- Voice commands

A superior living and driving experience.

Behind the wheel of the Daily HI-MATIC motorhome you will immediately notice that it drives like a car. The leather steering wheel, the dashboard designed to control your vehicle's operation easily without shifting your driving position, the adjustable seat with textile foam headrest, the excellent visibility provided by the ample windscreen and window surface, the efficient automatic climate control system will ensure your comfort on the longest journeys.

Designed around you.

The new seats are designed to adapt to your body, distributing your body weight evenly and reducing pressure peaks by up to 30%. They offer luxurious comfort and protect you from back pain, even on the longest drives.

First designed for NASA airplane seats, memory foam is highly energy absorbent and protect against impact.

- 1.** The central pads of the cushion and back rest, as well as the head rest, are in memory foam and mould to your shape.
- 2.** The side sections are made of a higher-density foam to improve containment.
- 3.** The front cushion, 20 mm longer and 15 mm thicker, provides better support for the legs of taller people.
- 4.** The entire structure of the seat has been redesigned to make it easier for you to get in and out of the vehicle.

Smooth ride.

The QUAD-Tor front suspension ensures outstanding drivability, comfort and dynamic response together with maximum stability. The rear suspension has been calibrated to control over-steering, and if you plan to drive on difficult roads, you can choose the rear pneumatic suspension for greater vibration dampening and driving stability. The AIR-PRO intelligent pneumatic suspension continuously adapts to driving conditions and reacts almost instantly to road disturbances. The excellent control on bends means you will negotiate winding roads with ease. Overall, you will enjoy a remarkably smooth - and safer - drive.

Smooth, effortlessly manoeuvrable.

With the very precise and reactive **Electric Power Steering**, you will enjoy a smooth driving experience requiring less steering effort, and a feeling of great stability and control. The unique **City Mode** will further reduce your steering effort by as much as 70% to give you ultimate driving pleasure when sightseeing in busy city centres.

Superior driving comfort and ergonomics.

The entire steering system is designed to give you the experience of a passenger car: you can adjust the steering wheel to set up your perfect driving position. The smaller, leather steering wheel puts a wide range of controls at your fingertips, adding to your comfort.

Tyre **safety and efficiency.**

The **Tyre Pressure Monitoring System** will help you drive safely and reduce your fuel consumption by providing real-time pressure readings of the individual tyres, so you can make sure you are always running on optimal tyre pressure.

High visibility **LED lights.**

The full **LED lights** will help you drive safely in low light situations, improving visibility and obstacle perception by 15% with a much sharper beam that carries further. You don't have to worry about changing them because LED lights have an extremely long life.

Parking **comfort and efficiency.**

The **Electric Parking Brake** automatically engages when you park and disengages when you are ready to drive away.

Unlimited **versatility.**

The Daily HI-MATIC combines the reliability of the rear wheel drive with an ample choice of configurations. Available with **single wheel or twin wheel** rear axle, **it is the only vehicle in its class that offers a range from 3.5 to 7.2 tonnes of Gross Vehicle Weight (GVW), with an intermediate 5.6 tonnes model, and a maximum front axle load up to 2,700 kg.**

Providing **excellent handling and stability**, and a towing capacity up to 3,500 kg, the Daily HI-MATIC is the best choice for premium motorhomes. This is also due to a class-exclusive feature designed to deliver toughness, flexibility and **durability over time**: its load-bearing structure with “C”-shaped, special steel cross-members, which places it at the top of its category in comparison to other car-derived vehicles. Thanks to the **8-speed automatic gearbox**, Daily HI-MATIC boasts a high level of versatility and is perfectly at ease both on city roads and on highways. A van version with a volume of up to 19.6 m³ is also available.

Daily 4x4

Holidays off the beaten track.

Tough outside, **comfortable** inside.

The Daily 4x4 combines a solid reinforced body with the comforts of an on-road motorhome, and will easily take you to the remotest locations for your holiday. Choose the right Daily 4x4 for you from the double offer of van and chassis cab with all-road and off-road versions, or the unique 7.0-tonne Gross Vehicle Weight (GVW) model featuring the 8-speed HI-MATIC gearbox, which combines extreme robustness with ultimate comfort.

Ready for **every holiday.**

The Daily 4x4 offers a full line-up of off- and all-road vehicles with GVW ranging from 3.5 to 7.0-tonnes and wheelbases from 3,080 mm to 4,175 mm to cover all your needs.

Go **everywhere.**

All-road twin wheel versions and off-road single wheel versions with GVW up to 7.0-tonnes.

Safety everywhere.

With all the safety features, such as the all disk brakes with ABS (Anti-lock Braking System), full airbags and ESP (Electronic Stability Programme) specifically developed for the Daily 4x4, you will be perfectly safe even in the remotest locations.

Unlimited **versatility.**

Enjoy a maximum of customization possibilities with the unique Daily 4x4 7.0-tonne GVW version with payload up to 4,300 kg and body length up to 5 meters.

Eurocargo

Luxury on the road.

Safety without compromises.

The Eurocargo fully protects both driver and family thanks to its robustness and brand new active safety features. The **Lane Departure Warning System** (LDWS) warns if the vehicle makes an unwanted lane change. The **Advanced Emergency Braking System** (AEBS) working in conjunction with the **Electronic Vehicle Stability Control** (EVSC) helps to mitigate or avoid collisions in case of distraction. Last but not least, the **Adaptive Cruise Control** (ACC) adjusts the speed by keeping the right safety distance from the vehicle in front.

Top driving comfort, top quality of life.

The Eurocargo cab takes comfort and ergonomics to a new level. Every control is conveniently placed within arm's reach. You can use the radio and phone in full safety with the steering wheel controls. The new knobs for climate control and the lights, together with the new design for the automated gearbox selection buttons, provide better ergonomics. In addition, multiple storage compartments for items and documents are available. The driver's side console houses two practical bottle holders, a 12V power socket and an optional compressed air socket.

Top liveability of the cab is a key priority: thanks to the linear dashboard and the compact dimensions of the engine tunnel, both driver and passenger can easily and freely move within and across the cab.

The **premium choice** for those who think big.

The Eurocargo has been specifically designed to be the base for building premium motorhomes. The renowned robustness of the chassis, the durability of the 4- and 6-cylinder Euro VI-E engines, delivering up to 320 hp and 1,100 Nm, the new ultra comfortable cab and the full air suspension, make the Eurocargo the perfect vehicle for travelling in full luxury and safety.

The Eurocargo is the only vehicle in its category to feature the innovative HI-SCR emission control system that eliminates the issues of forced regeneration at source. This unique system reduces fuel consumption, overheating and technical stoppages, allowing you to enjoy your holidays worry free.

Services – Stress-free holidays.

When you are far from home,
proximity and expertise matter.

Thanks to a widespread network of over 2,000 service points across Europe, with fully trained technicians and diagnostic experts, IVECO is always ready to help you and sort out any problems you may encounter, wherever you are, whenever you need us. Assistance Non-Stop offers you the support of a team of professional, multilingual operators available 24/7, 365 days a year. Help is available at all times on all roads within Europe through a universal toll-free number (0080048326000). The IVECO Customer Centre will monitor the situation and keep you updated on its progress, ensuring that your vehicle is back on the road in the shortest possible time. In the event that the repair is under IVECO warranty and takes longer than 24 hours, Camper customers can enjoy the facilities of a hotel, courtesy car, passenger return or onward journey and recovery of the repaired vehicle. A real holiday must be carefree. Always and everywhere thanks to IVECO Camper Assistance.*

SERVICES & CONDITIONS

Passenger repatriation or journey completion	Travel organisation either back home or onto your final holiday destination for all passengers by train - plane - rental car (max. 1,000 €)
Booking	Hotel booking for all passengers (120 € per person and night, max. 5 nights)
Vehicle recovery	Travel organisation for one person to recover the repaired vehicle, by train - plane - rental car (max. 1,000 €)
Replacement vehicle	Arrangements for a replacement vehicle (minivan or equivalent, max. 5 days and 1,000 € - nationwide returns)
Connection costs	Taxi to reach the rental agency/rail station/airport/hotel (max. 50 €)

*Available in Belgium, Luxembourg, Austria, Italy, Spain, France, Portugal, Germany, Poland, Czech Republic, Slovak Republic, Netherlands, United Kingdom, Ireland, Switzerland.

Mobile App

IVECO's assistance support is available 24/7, just a click away on your smartphone with the IVECO Non-Stop app.

In case of vehicle breakdown, you can enter your vehicle's information (VIN and registration number) and with a simple touch of a button you can send a request for assistance to the IVECO Customer Center. We will immediately activate the workshop closest to you and monitor the vehicle repair. You will receive real-time updates on your vehicle's assistance on your mobile device through the app.

The IVECO Non-Stop it's not only for emergencies, as you can also use the app to book repair work for your vehicle based on your location and time availability.

Genuine Parts

HIGH PERFORMANCE

Efficient braking system, maximum road holding, good day and night visibility, effective filtration of air and fluids: all these elements are essential to maintain the performance of your IVECO over time, protecting your journey from unplanned downtime and ensuring safety for you and your family. This is exactly what IVECO Genuine Parts, combined with the professional skills of IVECO technicians, can guarantee for your holiday.

Driven by customer satisfaction, IVECO continues to invest in the efficiency of its logistics services and parts warehouses. We strive to reach you with the right part, in the right place, at the right time with a fast and effective supply chain. IVECO also dedicates a team of more than 150 people across Europe to resolve cases of urgent parts for a Vehicle Off Road (VOR).

Contact us

Whether you're looking for answers, would like to solve a problem, or just want to let us know how we did, please get in touch through the Contact Us section at iveco.com. We'll help you to resolve any issues quickly and easily, so you can get back to more important things, like enjoying your holidays.

Assistance Non-Stop

IVECO Camper Center – a carefree holiday starts here.

By choosing IVECO, you choose quality! We guarantee top class services for your vehicle, tailored to your needs, so you can enjoy the holidays you deserve.

We operate a network of more than 2,000 IVECO service points to support our camper customers during their holidays. More than 320 of those points have won the IVECO Camper Center Award in recognition of their outstanding experience and expertise in looking after your IVECO motorhome in their dedicated facilities. The highly specialised experts working in these dedicated service centers across Europe can guarantee excellence in the support since they are continuously trained on technical skills and in particular camper modifications/variants.

The IVECO Camper Center can rely on the immediate response from the motorhome bodybuilder companies that support and assist them during the entire maintenance or repair process. In case of any doubts, the technicians can call the direct line linking them to IVECO and to the bodybuilder company that will support them during the repair.

Find the nearest IVECO Camper Center with the Dealer Locator also available on the DAILY BUSINESS UP™ and schedule a check up before leaving for your holiday in order to travel without worries:
